EXPRESS
FORMS ®

EXPRESSFORMS

SAVE TIME AND RESOURCES

Easy to use - Reliable - Secure

ExpressForms is a feature-rich digital forms repository and automation application which ensures the fast creation and processing of healthcare forms.

ExpressForms allows facilitates the ability to a more convenient, productive and paperless process. It will allow the user to complete the documentation process online without the need to store physical forms which occupies more space. As a result, hospitals become more efficient and save valuable resources.

ExpressForms is much more than a completion and printing software. Using native integration techniques, the application can populate valuable information such as patient demographics, visit ID, physician name directly from an EMR. This is done by seamlessly integrating with the existing hospital information systems and clinical devices.

ExpressForms has the ability to generate bar codes online which can be printed on specific forms. Users are able to scan bar codes which allow automated indexing to the patients record.

QUICK SIGN: *DOCUMENTS SIGNED QUICKLY!*

ExpressForms has a powerful feature "Quick Sign" which allows patients to sign on the consent and other forms electronically with the help of various signing devices such as writable screens & electronic signature pads.
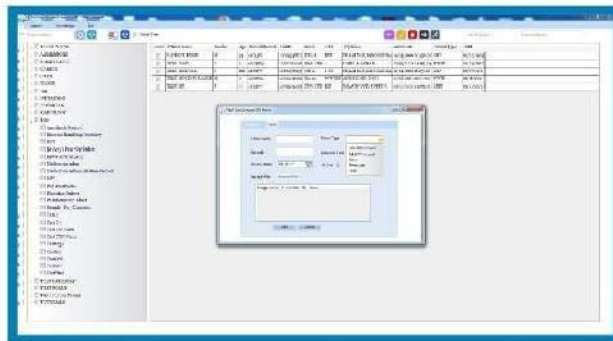

CUSTOM FORMS

ExpressForms provides users with an easy-to-use design including a "Template Designer" feature which can be managed via an administrator setting.
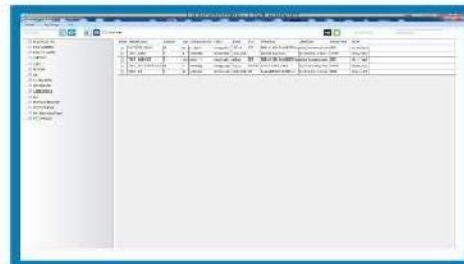

Intuition HIT Solutions

Featured benefits
